

PDF Mapping

in cooperation with **SUPPLYON**

Key Points:

- Suppliers' individual PDF invoices (system generated) are mapped into the SupplyOn system with validation of Siemens Energy & country specific rules

PDF Mapping requirements:

- PDF Invoices to be ERP-system generated with fixed invoice layout
- Mandatory information on the invoice such as
 - order number
 - line items incl. numbers
 - tax details incl. tax exemption reason
 - delivery date
 - payment information

Integration process steps:

- Mapping of suppliers' current invoice layout by Siemens Energy
- After go-live communication PDF invoice has to be sent to a new (supplier specific) email adress from SupplyOn

What are the benefits?

- No process change at supplier side
- No additional cost for PDF Mapping for supplier
- Reduced leadtime from invoice receipt to payment
- Quality check before invoice booking
