September 2026

Dear Customers,

Sustainability in its three dimensions (Environment, People & Society, Responsible Business Practices) is of the highest importance for Siemens Energy. Sustainable conduct forms the basis of our business decisions and dealings with our stakeholders. In order also to ensure Sustainability in our Supply Chain we have established the “Code of Conduct for Siemens Energy Suppliers and Third Party Intermediaries”. We contractually commit our suppliers to this Code of Conduct and, in turn, also expect them to promote these standards to their own suppliers.

Siemens Energy is not listed on any U.S. stock exchange and thus not under an obligation to respond to the SEC requirements published in August 2012 and to issue a conflict minerals report. Nevertheless, Siemens Energy continues to exercise its duty of care within the supply chain.

Furthermore, we have implemented uniform and enterprise-wide processes to determine the use, source and origin of the relevant raw materials in our supply chain (“Supply Chain Due Diligence”). These processes are designed in accordance with internationally recognized due diligence frameworks and may make use of established industry assurance mechanisms, assessment methodologies, and risk mitigation approaches, where appropriate and permissible under applicable law. We work closely with our suppliers to carry out these steps in order to remediate risks and perform additional due diligence so that we can continue to source responsibly, building on established management processes.

If you have any queries regarding Responsible Raw Materials Sourcing, please refer to our global “Responsible Raw Materials Sourcing Policy”, which can be found on our website: www.siemens-energy.com/responsible-raw-materials.

Siemens Energy has adopted industry-wide approach for reporting on the presence of 3TG (Tantalum, Tin, Tungsten or their derivatives and Gold) and other raw materials in our global supply chain. Please find further information in the applicable “Siemens Energy Conflict Minerals Reporting Template" and other reporting templates.

The scope of this template encompasses Siemens Energy AG and its consolidated subsidiaries.

Sincerely

Barbara Buttinger
Head of Procurement
