The Conditions of Purchase of Siemens Energy NV/SA (hereinafter referred to as "Siemens Energy")

Version September 2025

Field of Application, Order and Order Confirmation

These Conditions of Purchase shall apply to all purchases of Siemens Energy of tangible and/or intangible goods and/or services. They shall also apply to other agreements in which Siemens Energy is involved as the customer, i.e. in contracts of undertaking, lease contracts or contracts for assembly and services.

These Conditions of Purchase shall apply in addition to the conditions set forth in the order of Siemens Energy and, as the case may be, to special terms of purchase provided by Siemens Energy. **The Supplier's terms and conditions shall not be applicable unless explicitly accepted in writing by Siemens Energy, without giving effect to Article 5.23 of the Belgian Civil Code. For the avoidance of doubt, no agreement is made in case of incompatible terms & conditions.**

By accepting the order the supplier acknowledges that it has read these Conditions of Purchase and that it accepts them without reservation. Any alterations, amendments or additions to the order shall only become a part of the contract if Siemens Energy agrees to them in writing. The acceptance of deliveries or services as well as payments do not constitute such agreement.

As long as the supplier has not confirmed acceptance of the order ("Order Confirmation") in writing, Siemens Energy may cancel the order without incurring any liability.

Commencement of implementation of the order shall be considered as acceptance of the order including any special terms of purchase provided by Siemens Energy and these Conditions of Purchase.

Rights of Use

The supplier hereby grants to Siemens Energy the following irrevocable, royalty-free, non-exclusive, transferable, worldwide and perpetual rights:

to amend, to modify, to use the deliveries and services, to integrate them into other products and to distribute them worldwide;

to use or allow others to use software and its related documentation (collectively "Software") in connection with the installation, launch, testing and operation of the deliveries and services;

to sublicense the right of use under section 2.1.2 above to Affiliates (companies, directly or indirectly, controlled by, or controlling, or under common control of Siemens Energy; hereinafter "Affiliates"), to distributors and end customers;

to license Affiliates and distributors the right to sublicense the right of use under section 2.1.2 above to end customers;

to use the Software for integration into other products and to copy the Software, or to allow Affiliates or distributors to use and copy the Software;

to distribute, sell, hire out, lease, make ready for download or make publicly available the Software, e.g. in the context of providing a service application or in other contexts, and to copy the Software to the extent required, always provided that the number of licenses being used at any one time does not exceed the number of licenses purchased;

to sublicense the right of use under section 2.1.6 above to Affiliates and distributors.

In addition to the rights granted in section 2.1 above, Siemens Energy, Affiliates and other distributors are authorized to allow end customers to transfer Software licenses.

The supplier shall inform Siemens Energy - at the latest at the time the order is confirmed - whether the products and services to be delivered contain "open source software".

In the context of this provision "open source software" means any software that is provided royalty-free by the respective licensor to any user on the basis of a license or another agreement with the right to modify and/or to distribute such software. By means of example and without limitation, "open source software" licenses include the following licenses: the "GNU General Public License (GPL)", the "GNU Lesser GPL (LGPL)", the "BSD License", the "Apache License" or the "MIT License". Should the products and services delivered by the supplier contain "open source software", the supplier must deliver to Siemens Energy at the latest at the time the order is confirmed the following:

- The source code of the relevant "open source software", insofar as the applicable license or other agreement allows the disclosure of this source code;
- A schedule of all "open source files" used, indicating the relevant license(s) and including a copy of the complete text of such license(s);
- A written declaration that through the intended use of the "open source software" neither the products of the supplier nor the products of Siemens Energy will be subject to a "Copyleft Effect". In the context of this provision, "Copyleft Effect" means that the provisions of the open source software license require that certain of the supplier's products, as well as any products derived from these, may only be distributed further in accordance with the terms of the open source software license e.g. only if the source code is disclosed.

If the supplier did not indicate before the receipt of the order that its products or services contain "open source software", Siemens Energy is, after discovering that the products or services contain "open source software", entitled to terminate the contract within fourteen (14) days, or to request the supplier to deliver the information contained in the above paragraph to Siemens Energy. If the supplier fails to deliver this information within a reasonable time, Siemens Energy is entitled to terminate the contract.

Rescheduling, Delay

The supplier undertakes to supply the goods and services in accordance with the requirements of time and place as set out in the order. For the purpose of establishing the timeliness of delivery or rectification, the relevant point in time is the date of receipt at the place of receipt designated by Siemens Energy, and for deliveries involving installation, commissioning or rectification services, the relevant point in time shall be the date of acceptance.

Upon giving the supplier at least ten (10) calendar days prior notice ("Postponement Notice"), Siemens Energy may postpone the date of delivery at no cost to Siemens Energy.

Where any delay in delivery or performance or rectification can be anticipated, the supplier shall notify Siemens Energy immediately and seek its decision.

Siemens Energy reserves the right to reject any delivery which does not conform to the requirements of time and place as set out in the order or, as the case may be, in the Postponement Notice and to return such delivery to the supplier at the risk and cost of the supplier.

In the event of delay, Siemens Energy may, without previous notice, impose liquidated damagesin respect of each commenced working day of delay amounting to 0.5% of the total value of the contract, without prejudice to any other rights of Siemens Energy, including the right to demand compensation for the actual damage incurred by Siemens Energy due to the delay.

Transfer of Risk, Dispatch and Place of Performance

For deliveries involving installation, commissioning, software or services, the transfer of risk occurs at final acceptance. For other deliveries the transfer of risk shall take place at the time of Siemens Energy confirming the receipt of the delivery by signing the dispatch note without reservation or, in the absence of such note, upon receipt by Siemens Energy of the deliveries without reservation at the designated place of receipt.

Unless otherwise agreed, the costs of delivery and packaging shall be borne by the supplier. In case of pricing ex works or ex warehouse, transport shall in each case be at the lowest possible cost, insofar as Siemens Energy has not requested a particular method of delivery. Where the price is quoted free to the recipient, Siemens Energy may determine the method of transportation. Any supplementary costs arising from the need to meet the delivery deadline by way of expedited delivery shall be borne by the supplier.

Each delivery shall include two dispatch notes, dated and numbered, with details of the contents as well as the order number.

If the transport is performed by a carrier commissioned by Siemens Energy, the supplier will inform the carrier of the necessary data concerning dangerous goods in accordance with the legal requirements. The same shall apply with regard to a further carrier, if Siemens Energy informs the supplier that following the initial transport another transport is scheduled.

The supplier shall be liable for any expenses and/or damages incurred by Siemens Energy due to any breach of the obligations under this Art. 4.

Invoices

All invoices shall be addressed and sent to Siemens Energy NV/SA, Accounting department, Guido Gezellestraat 125, 1654 Beersel (Huizingen), Belgium (e-invoices to be sent to : accountspayable485X_inv.be@siemens-energy.com).

Each invoice shall at least detail the relevant purchase order number, the numbers and quantities of the invoiced items and the invoice date. Insofar as any such details are omitted, the invoice shall not be payable.

Copies of an invoice shall be marked as duplicates. The supplier shall not combine several orders on one invoice.

Payment

Payments shall be made in Euros. The payment term of sixty (60) calendar days starts as soon as the delivery of goods or the execution of the services have been completed in accordance with the purchase order and Siemens Energy has received a correctly drafted and undisputed invoice.

Insofar as the supplier is required to provide material testing, test records or quality control documents or any other documentation, such shall be a part of the requirements of the completeness of the delivery or performance of the services.

A payment shall be deemed overdue only if Siemens Energy fails to pay in response to a notification in writing received after payment becomes due.

Payment does not constitute an acknowledgement of Siemens Energy that the corresponding deliveries or services meet the specifications or are free of defects.

The supplier may not suspend the provision of any deliveries or services if any invoice has been placed in dispute by Siemens Energy.

Siemens Energy is a trademark licensed by Siemens AG.

The Supplier may not request any adjustment in Payment in case of an unforeseeable change of circumstances that can have any financial impact on the Supplier during the provision of any deliveries or services under the contract. The Supplier waives its right for hardship as stated in article 5.74 of the Belgian civil code.

Taxes

The consideration referred to in the contract is exclusive of any applicable statutory value added tax, sales tax or other similar taxes (hereinafter "VAT").

The suppler shall issue to Siemens Energy a proper VAT invoice in the form and within the time limits as required by the applicable tax laws and/or regulations in force at the time of issuing the invoices. All VAT amounts shall be duly reported and paid to the competent tax authorities by the supplier or, where a reverse charge applies, by Siemens Energy, as required by applicable tax laws and/or regulations. Should Siemens Energy be eligible for a refund of VAT imposed under the applicable tax laws and/or regulations of supplier's country, the Supplier shall use all reasonable efforts to support Siemens Energy in obtaining the aforementioned VAT refund from the tax authorities.

If and to the extent required by applicable tax laws and/or regulations, Siemens Energy shall, (i) deduct withholding tax from the payments to the supplier and duly pay it to the competent tax authorities as required by applicable tax laws and/or regulations and (ii) send the official tax receipt to the supplier, evidencing duly payment of such taxes. It is supplier's responsibility to apply for a tax refund or tax reduction with the competent tax authorities under an applicable double taxation agreement.

Subject to the above sections, each party shall be responsible for and bear any and all other taxes, duties, charges, or other fees imposed by law on, or otherwise (in accordance with the applicable local law) for the account of such party.

All invoices issued pursuant to the contract shall comply with applicable tax laws and/or regulations.

Inspections

Siemens Energy may but is not obligated to carry out any inspections upon receipt of the deliveries including examining whether a delivery corresponds to the quantity and type of products ordered and whether there is any external recognizable damage or another deficiency. The execution or non-execution of inspections shall not in any way affect the liability of the supplier.

Should Siemens Energy, however, discover any deficiency in the course of such inspections or at a later stage, it shall inform the supplier of such deficiency within a reasonable time.

Warranty

The supplier warrants (i) that it has title to the goods (ii) that the goods are free and clear of any security interest, lien or encumbrances, (iii) that the goods are newly manufactured and meet the agreed specifications, (iv) that the goods are free from defects in design, material and workmanship, without development defects or manufacturing defects, are fit for purpose and conform with all applicable legal and administrative requirements, applicable industry standards, norms and safety regulations in Belgium, at the place of receipt and at the designated place of use, (v) that it will carry out the services within the time periods agreed and with all reasonable care and skill in accordance with all applicable laws and all provisions agreed in the contract, in particular the service levels, and (vi) that it has examined any Software for viruses and security gaps and has removed any viruses and security gaps prior to the delivery of the Software.

If in the order reference is made to technical, safety, quality or other provisions and documents which are not appended to the order, the supplier shall be considered to be familiar therewith, unless the supplier has notified Siemens Energy of the contrary in writing immediately.

If Siemens Energy notifies to the supplier that any goods or services fail to meet any of the warranties specified in Art. 8.1, the supplier shall at its own expense and at the discretion of Siemens Energy without undue delay either (i) repair the deficiency or (ii) re-perform the services or replace the deliveries. Siemens Energy may as well choose to (iii) demand a reduction in price, (iv) cancel the contract in whole or in part without incurring any liability, (v) claim damages in lieu of performance or (vi) undertake itself any repair or re-performance of service or replacement of delivery or arrange for such to be done, all at the expense of the supplier.

The supplier shall indemnify Siemens Energy against any and all cost (including those related to the transportation, de-installation, re-installation and commissioning in connection with the performance of the warranty obligations), any damage of whatever nature or liability arising from supplier's non-compliance with any warranty or other obligation under this Art. 8.

Insofar as no statutory provisions provide for a longer period, the warranty period shall be three (3) years. The warranty period shall start to run with the transfer of risk as defined in Art. 4.1. If the supplier provides subsequent performance or repairs, the warranty period shall start to run again.

With regard to hidden defects, Siemens Energy shall keep its warranty rights even after the warranty period has elapsed in accordance with the Belgian statutory provisions in relation to hidden defects (articles 1641-1649 Belgian Civil Code).

Should a third party demand compensation from Siemens Energy in relation to a deficiency of goods and services provided by the supplier, the supplier undertakes to support Siemens Energy in the defense of the claim, intervene voluntarily in any proceedings, whether they be judicial or extra-judicial, and to make available to Siemens Energy all relevant documentation and information, and to bear all the costs, expenses and fees related to the defense of Siemens Energy.

The supplier undertakes to take out adequate insurance to cover its warranty risks and undertakes to furnish evidence thereof to Siemens Energy upon request.

Third Party Rights

The supplier undertakes to inform Siemens Energy in relation to the goods and services provided by supplier of any possible conflicting third party rights, e.g.. intellectual property rights.

The supplier shall indemnify Siemens Energy against any possible cost, any damage of whatever nature or liability in direct or indirect relation to any infringement or alleged infringement of third party rights, i.e. intellectual property rights, in relation to the goods and services provided by supplier.

In addition, the supplier undertakes at its own expense, at Siemens Energy's first request and at the discretion of Siemens Energy, either to replace or modify the infringing or allegedly infringing goods with equivalent, non-infringing goods or to obtain a license in favor of Siemens Energy for continued usage.

Provided Material

Material provided by Siemens Energy remains the property of Siemens Energy and is to be labeled as property of Siemens Energy and stored and administered separately. Its use is limited to the orders of Siemens Energy only. The storage and the use are at the exclusive risk of the supplier.

Confidentiality

Any tools, patterns, samples, models, profiles, drawings, standard specification sheets, printing templates, documents, materials and other information (collectively "Information") provided by Siemens Energy shall remain the property of Siemens Energy and shall, without the prior written consent of Siemens Energy, not be made available to any third party nor used for any other purposes than those contractually agreed. Such Information shall be protected against unauthorized access or use. The supplier is obliged to return any Information to Siemens Energy upon first request.

In the event of the supplier's non-compliance with the obligations stated in Art. 11.1, Siemens Energy shall be entitled to withdraw from the contract either in full or in part and/or to demand compensation.

The provisions of this Art. 11 shall remain in place for a period of four (4) years after termination for whatever reason or expiration of the respective contract.

Data Protection

The supplier shall adhere to any applicable data protection law and shall implement appropriate technical, physical and organisational security measures to protect Personal Data against loss and unlawful processing. The supplier shall keep Personal Data confidential and shall not disclose Personal Data in any way to any third party without the prior written approval of Siemens Energy, except where Personal Data need to be disclosed to a competent public authority to comply with a legal obligation or as required for audit purposes.

In its capacity as data processor, the supplier shall and shall procure that its employees only process Personal Data: (i) in accordance with Siemens Energy' instructions; or (ii) where required by applicable data protection law. In the event of a Personal Data Breach, the supplier shall promptly (i) take adequate remedial measures, (ii) provide Siemens Energy with all relevant information and (iii) fully cooperate with Siemens Energy. The supplier shall not transfer or disclose Personal Data to any party located outside the European Economic Area without the express prior written approval of Siemens Energy. Siemens Energy and Siemens Energy' nominated representative(s) shall, subject to the reasonable business security requirements, have the right to audit the supplier's compliance with the obligations under this Art. 0.

All Personal Data shall be immediately returned to Siemens Energy and/or deleted upon Siemens Energy' first request after the termination of the agreement.

For the purpose of the above "Personal Data" shall mean any information relating to an identified or identifiable Data Subject. "Data Subject" shall mean any individual who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person. "Personal Data Breach" shall mean a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, Personal Data transmitted, stored or otherwise processed. "Non-Adequate Country" shall mean a country that is deemed not to provide an adequate level of protection of Personal Data within the meaning of the general data protection regulation 2016/679 of the European Parliament on the protection of natural persons with regard to the processing of personal data and on the free movement of such data.

Siemens Energy is a trademark licensed by Siemens AG.

Subcontracting to Third Parties, Assignment of rights and obligations

The supplier shall without the prior written consent of Siemens Energy not be allowed to subcontract the contract with Siemens Energy to any third party or to transfer the contract or any rights or obligations thereunder to any third party. In case of non-compliance, Siemens Energy shall be entitled to terminate the contract either in full or in part and/or to demand compensation.

Siemens Energy may entirely or partially transfer the contract and any rights and obligations thereunder to any of its Affiliates and – in connection with any type of merger, divestiture or any other type of business reorganization or business combination, including the establishment of joint venture companies – to any third party.

Termination

Siemens Energy may, by giving written notice to the supplier, terminate the contract, in whole or in part, without liability towards the supplier and save of any other rights and claims Siemens Energy may have, with effect from the date specified in the termination notice, if the supplier:

voluntarily files a petition in bankruptcy or has such a petition involuntarily filed against it or is liquidated or suffers from other circumstances that negatively affect its ability to obtain credit;

fails to perform any of its contractual obligations, provided that where such breach is capable of remedy, the supplier fails to remedy such breach without undue delay of being notified of such breach by Siemens Energy.

In the event of termination, Siemens Energy may continue to utilize existing facilities, deliveries or services already performed by the supplier in exchange for reasonable payment as mutually agreed upon between the parties.

The Supplier waives its right under articles 5.90 to 5.96 of the Belgian civil code to terminate the contract by notice to Siemens Energy.

In case of a termination pursuant to Art. 14.1.2 , the supplier shall compensate Siemens Energy upon first request for any damage of whatever nature with a minimum amount of 15 % of the total value of the contract.

Siemens Energy may terminate the contract, in whole or in part, for its convenience at any time by giving at least twenty (20) calendar days notice to the supplier. In such case, the supplier shall be entitled to receive payment for all the services, works and delivieries performed prior to the date of termination and documented costs directly resulting from the termination. The supplier shall not be entitled to claim any other damage whatsoever, including damage for lost profits incurred due to the termination of the contract.

Siemens Energy Code of Conduct, Security in the Supply Chain

The supplier must observe the principles and requirements of the “Code of Conduct for Siemens Energy Suppliers”, which supplier acknowledges to have received (referred to hereinafter as the “Code of Conduct”). Furthermore, the supplier must do its utmost to provide the Code of Conduct to its own suppliers and persuade them to duly respect its principles and requirements.

The supplier is obliged to comply with the laws of the applicable legal system(s). In particular, the supplier will not engage, actively or passively, nor directly or indirectly in any form of bribery, in any violation of basic human rights of employees or any child labor. Moreover, the supplier will take responsibility for the health and safety of its employees, the supplier will act in accordance with the applicable environmental laws and will use best efforts to promote the Siemens Energy Code of Conduct among its own suppliers.

In order to guarantee security in the supply chain according to the requirements of internationally recognized initiatives based on the WCO SAFE Framework of Standards (e.g. AEO, C-TPAT), the supplier shall provide the necessary organizational instructions and take the necessary measures, particularly with regard to the following security issues: premises security, packaging and transport, business partners, personnel and information. The supplier shall protect the goods and services provided to Siemens Energy or provided to third parties designated by Siemens Energy against unauthorized access and manipulation. The supplier shall only deploy reliable personnel for those goods and services and shall obligate any sub-suppliers to take equivalent security measures.

In addition to other rights and remedies Siemens Energy may have, Siemens Energy may terminate the contract, in whole or in part, in case of breach of these obligations by the supplier. However, provided that supplier's breach of contract is capable of remedy, Siemens Energy's right to terminate is subject to the proviso that such breach has not been remedied by the supplier within a reasonable grace period set by Siemens Energy.

Environmental Protection, Duties to Declare, Dangerous Goods

Should the supplier deliver products to which product related statutory and legal requirements apply in view of their further marketing in the European Economic Area or to which corresponding requirements apply regarding other countries notified by Siemens Energy to the supplier, then the supplier must ensure compliance of the products with these requirements at the time of the transfer of the risk. Furthermore, the supplier must ensure that all documents and information which are necessary to provide the proof of conformity of products with the respective requirements can be furnished immediately to Siemens Energy upon request.

Should the supplier deliver products, subtances of which are set out in the socalled “List of Declarable Substances” (www.bomcheck.net/suppliers/restricted-and-declarable-substances-list) applicable at the time of the order or which are subject to statutorily-imposed substance restrictions and/or information requirements (e.g. REACH, RoHS), supplier shall declare such substances and provide information as requested in the web database BOMcheck (www.BOMcheck.net) no later than the date of first delivery of the products. With respect to the statutory imposed substance restrictions the foregoing shall only apply with respect to laws which are applicable at the registered seat of supplier or Siemens Energy or at the place of delivery designated by Siemens Energy.

The supplier shall provide all necessary data and information in accordance with the EU Carbon Border Adjustment Mechanism (CBAM) statutory regulations in a timely manner upon request of Customer in order to meet the Customer´s external obligations. CBAM latest developments as well as guidance can be accessed on the official Carbon Border Adjustment Mechanism Website; currently available under the following link:
Carbon Border Adjustment Mechanism - European Commission (europa.eu)

The supplier shall either avoid supplying products containing per- and polyfluoroalkyl substances (“PFAS”) or inform Siemens Energy about PFAS contained in its products in a timely manner upon request of Siemens Energy. PFAS shall mean substances that are subject to the PFAS proposal of the European Commission. The supplier shall keep itself informed about the changes to the PFAS proposal and the expected restrictions to go into force in 2026/2027.

The supplier shall provide in a timely manner upon request of Siemens Energy all required information and proof of deforestation free products (down to the producer of the raw material) in line with the Regulation on Deforestation-free Products of the European Commission (“EUDR”).

Export Control and Foreign Trade Data Regulations

The supplier shall comply with all applicable export control, customs and foreign trade regulations (“Foreign Trade Regulations”). The supplier shall advise Siemens Energy in writing within two weeks of receipt of the order – and in case of any changes without undue delay – of any information and data required by Siemens Energy to comply with all Foreign Trade Regulations in case of export and import as well as re-export, including without limitation:

- All applicable export list numbers, including the Export Control Classification Number according to the U.S. Commerce Control List (ECCN); and
- the statistical commodity code according to the current commodity classification for foreign trade statistics and the HS (Harmonized System) coding; and
- the country of origin (non-preferential origin); and – upon request of Siemens Energy – supplier's declaration of preferential origin (in case of European suppliers) or preferential certificates (in case of non-European suppliers).
- Upon request of Siemens Energy, evidence of the country of origin of the iron and steel inputs used for the processing of the goodsshall be promptly provided by the supplier, as well as evidence of the country of origin of crude oil which has been used for refining the Products.

The supplier shall be liable for any expenses and/or damages incurred by Siemens Energy due to any breach of the obligations according to Art. 0.

Ban on re-exports to Russia („No Russia Clause“)

Siemens Energy hereby prohibits to the supplier, and the supplier agrees, not to re-export and/or forward, directly or indirectly, to Russia or for use in Russia any supplied goods as well as technology (and related documentation, regardless of the mode of provision) provided by Siemens Energy to the supplier under this contract. Siemens Energy shall be entitled to terminate this contract by written notice in the event of a breach by the supplier of the obligation pursuant to article 14 of this contract. Upon termination, the supplier shall pay to Siemens Energy all costs and damages incurred by Siemens Energy from such termination. In any case, the supplier shall pay Siemens Energy liquidated damages in the amount of [20] % of the [purchase price/delivered goods value].

The supplier shall indemnify and hold harmless Siemens Energy in full from and against any claim, proceeding, action, fine, loss, cost and damage asserted by public authorities or other third parties against Siemens Energy arising out of or relating to a breach by the supplier of the obligation under article 18 of this contract and the supplier shall compensate Siemens Energy for all losses and expenses incurred resulting thereof.

Cybersecurity

The supplier shall take appropriate organizational and technical measures to ensure the confidentiality, authenticity, integrity and availability of the Supplier Operations as well as the goods and/or services. These measures shall be consistent with good industry practice and shall include an appropriate information security management system consistent with standards such as ISO/IEC 27001 or IEC 62443 (to the extent applicable).

Siemens Energy is a trademark licensed by Siemens AG.

"Supplier Operations" means all assets, processes and systems (including information systems), data (including Siemens Energy data), personnel, and sites, used or processed by the supplier from time to time in the performance of this agreement.

Should the goods and/or services contain software, firmware, or chipsets:

(i) the supplier shall implement appropriate standards, processes and methods to prevent, identify, evaluate and repair any vulnerabilities, malicious code, and security incidents in the goods and/or services which shall be consistent with good industry practice and standards such as ISO/IEC 27001 or IEC 62443 (to the extent applicable);

(ii) the supplier shall continue to support and provide services to repair, update, upgrade and maintain the goods and/or services including the provision of patches to Siemens Energy remedying vulnerabilities for the reasonable lifetime of the goods and/or services;

(iii) the supplier shall provide to Siemens Energy a bill of materials identifying all third-party software components contained in the goods. Third-party software shall be up-to-date at the time of delivery to Siemens Energy;

(iv) the supplier shall grant to Siemens Energy the right, but Siemens Energy shall not be obliged, to test or have tested the goods for malicious code and vulnerabilities at any time, and shall adequately support Siemens Energy;

(v) the supplier shall provide Siemens Energy a contact for all information security related issues (available during business hours).

The supplier shall promptly report to Siemens Energy all relevant information security incidents occurred or suspected and vulnerabilities discovered in any supplier operations, services and goods, if and to the extent Siemens Energy is or is likely to be materially affected.

The supplier shall take appropriate measures to achieve that its subcontractors and suppliers shall, within a reasonable time, be bound by obligations similar to the provisions of this section.

Upon Siemens Energy's request, the supplier shall provide written evidence of its compliance with this section including generally accepted audit reports (e.g., SSAE-16 SOC 2 Type II).

Promptly following Siemens Energy's request, the supplier shall provide to Siemens Energy all related documentation and the current and readable source code and object code of software developed or converted for Siemens Energy.

Siemens Energy has the right to yearly audit or have audited the supplier's compliance with the provisions of this section at the supplier's relevant site(s) without cause and, in addition, if Siemens Energy has a justified suspicion that the supplier is not in full compliance with those provisions, in each case upon reasonable prior notice.

For data generated by products or services provided under the contract and integrated into Customer products or solutions, Siemens Energy may use and share such data when acting as Data Holder under the EU Data Act (as defined in Art. 2 No. 13 of the Data Act). If the supplier is the Data Holder, it shall coordinate any disclosure with Siemens Energy and safeguard Siemens Energy's intellectual property (including trade secrets and know-how).

The supplier shall not use any data of Siemens Energy, including any data derived from or generated using any data of Siemens Energy, for its own purposes, including, without limitation, the training, fine-tuning, or evaluation of any AI Component ("AI" = Artificial Intelligence) or other AI systems or AI models or similar technologies, unless Siemens Energy has provided its prior written consent to such use. The foregoing restriction shall also apply in case the data is anonymized or pseudonymized.

CE marking

By accepting these Conditions of Purchase, the supplier confirms that the goods contain the obligatory CE marking by which the manufacturer indicates that the product is in conformity with the applicable requirements set out in the European Union harmonisation legislation providing for its affixing. Any delivery of goods that do not contain a CE marking for any reason whatsoever is only allowed after the prior written approval of Siemens Energy.

Languages

By accepting these Conditions of Purchase, the supplier confirms that the goods comply with the relevant national regulation(s) implementing directive 2006/42/EC on machinery, if applicable. For machinery placed on the market and/or put into service in Belgium, Siemens Energy points out that, by law, any written information and warnings and any instructions (including assembly instructions, technical files, relevant technical documentation) should be accompanied by a translation in Dutch, French and German.

Mention as Reference Customer

Only upon prior written approval of Siemens Energy, the supplier shall be allowed to mention Siemens Energy as a reference customer and/or make reference to products or services which the supplier has developed during the performance of an order for Siemens Energy.

Netting clause

Siemens Energy is entitled to set off all eventual claims that it or any of its Affiliates might have against the supplier's claims.

Assignment of Claims

Any assignment of any claim is only allowed with the prior written approval of Siemens Energy.

Severability

If any provision of these Conditions of Purchase is found to be wholly or partly illegal, invalid, void, voidable or unenforceable, to the extent of such illegality, invalidity, voidness, voidability or unenforceability, such provision shall be deemed severable and will be mitigated and amended to the extent required to render it lawful under applicable law, and the remaining provisions and the remainder of such provision shall continue in full force and effect.

Reservation Clause

Siemens Energy shall not be obligated to fulfill this contract if such fulfillment is prevented by any impediments arising out of national or international foreign trade or customs requirements or any embargoes or other sanctions.

Place of Jurisdiction and Applicable Law

Any dispute concerning the entering into force, the validity, interpretation, execution, suspension, termination and enforcement of these Conditions of Purchase and any contracts or underlying agreements that are regulated by these Conditions of Purchase, shall be exclusively resolved by the competent courts of Brussels.

Belgian substantive law shall apply to these Conditions of Purchase and any contracts or underlying agreements that are regulated by these Conditions of Purchase, excluding the provisions of the United Nations Convention of Vienna on the Sale of Goods of 11.4.1980.

Siemens Energy is a trademark licensed by Siemens AG.
