Following activities are carried out: \_\_\_\_\_

The Siemens Energy Austria GmbH (SEA) expressly points out that the legal requirements regarding safety and environmental protection at work on the construction site / the business location / the building must be complied with.

**Responsibility concerning work safety of employees belonging to your company lies with your company.**

The requirements of SEA and the on-site safety regulations (e.g. visitor info) as well as those of the corresponding site manager / location manager / building manager (construction coordination) are to be fully complied with. Work safety directives of the SEA site / location / building manager must be followed.

The identification of hazards, the assessment of corresponding risks and a workplace evaluation for your company's activities must be carried out prior to the commencement of work.

Your employees must be briefed in regard to safety-related matters. Minutes are to be kept and copies must be submitted to the site / location / building manager of SEA upon request.

Your employees must be fitted with the necessary personal protective equipment (PPE). The PPE must be used by the employees.

Utilized tools, working substances and work equipment must comply with the legal requirements (inspection, safety devices).

Should non-compliance with these requirements result in problems with the main ordering party, SEA retains the right to take legal action as well as the option to remove employees, due to non-compliance with environment, health, safety (EHS) regulations, from the construction site and the company premises.
