

# Direct EDI via SupplyOn

in cooperation with **SUPPLYON**

## Key Points:

- Integration handled by SupplyOn
- One time implementation effort that requires IT experts on supplier side
- Connected to costs (not transactional) for suppliers to ensure continuous use and automation

## Direct EDI requirements:

- Supplier needs to be registered in SupplyOn (WebUI) as prerequisite
- Supplier supports one of SupplyOn offered connectivity protocols and EDI formats
- Availability of resources for EDI implementation project on supplier side

## Integration process steps:

- If needed an info call can be requested via [Integration-Service@supplyon.com](mailto:Integration-Service@supplyon.com)
- The EDI Project needs to be ordered via the [SupplyOn Shop solution](#)

## What are the benefits?

- Direct integration of SupplyOn to suppliers ERP system
- No manual handling, fully automated process
- Reduced leadtime from invoice receipt to payment
- Quality check before invoice booking
