

# Siemens Energy – Sustainability Report 2024: SASB Index

Topic	Accounting Metric	Code	Reference	Explanation
Energy Management	Total energy consumed	RT-EE-130a.1	↗ <a href="#">Sustainability Report 2024:</a> Decarbonization, p. 28-34	
	Percentage grid electricity			
	Percentage renewable			
Hazardous Waste Management	Amount of hazardous waste generated, percentage recycled	RT-EE-150a.1	↗ <a href="#">Sustainability Report 2024:</a> Conservation of Resources, p. 44-47	During fiscal year 2024, there were no significant environmental incidents related to Siemens Energy (fiscal year 2023: one).
	Number and aggregate quantity of reportable spills, quantity recovered	RT-EE-150a.2	↗ <a href="#">Sustainability Report 2024:</a> Conservation of Resources, p. 44-47	
Product Safety	Number of recalls issued, total units recalled	RT-EE-250a.1	↗ <a href="#">Sustainability Report 2024:</a> Product Stewardship, p. 48-51	Product safety encompasses the safety of all products, solutions, and services manufactured, provided, and/or sold by Siemens Energy. These products, solutions, and services are developed according to the latest technical knowledge and comply with applicable legal requirements to ensure that they do not pose an unacceptable risk to life, health, property, or the environment. Product stewardship at Siemens Energy follows the key standards of the ISO 14000 series, with individual approaches for each Business Area. The approaches are centrally supported by the respective Global Environmental, Health and Safety (EHS) departments. In fiscal year 2024, improvement measures included the introduction of product safety issue handling and risk assessment procedures at the corporate level as well as continued product safety awareness training (approximately 4,600 colleagues had participated in this training by the end of the fiscal year). Numerous workshops have been held to analyze our strengths and weaknesses and collaborate to better serve our customers, both internal and external. During fiscal year 2024, two significant product safety incidents were reported. One incident was related to safety issues in the design of service lifts in some Siemens Gamesa wind turbine types. The issue is being addressed in accordance with our TE function through the implementation of design changes and retrofits. The other is still under investigation, after the explosion of gas dryer equipment in September 2024. We sent a warning to all customers with this equipment and will consider lessons learned for design and development.
	Total amount of monetary losses as a result of legal proceedings associated with product safety	RT-EE-250a.2	↗ <a href="#">Annual Report 2024:</a> p. 27; Note 14, Provisions, p. 115; Note 18, Legal proceedings, p. 118	

Topic	Accounting Metric	Code	Reference	Explanation
Product Lifecycle Management	Percentage of products by revenue that contain IEC 62474 declarable substances	RT-EE-410a.1	↗ <a href="#">Sustainability Report 2024: Product Stewardship</a> , p. 48-51	<p>We aim to comply with all legal requirements, such as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), RoHS (Restriction of Hazardous Substances), our SAP systems and similar international requirements. Siemens Energy uses globally standardized materials and substance registers for restricted and declarable substances and products. The updated ECHA list identifies any substances that need to be declared for each product (ECHA = European Chemicals Agency). As part of the Siemens Energy supplier assessment and qualification process, suppliers are required to identify whether any of their products or components contain substances that need to be declared according to the specific legislation. Suppliers then need to provide a detailed declaration should any such substances be used within their design and manufacturing activities.</p> <p>We encourage our suppliers to use the industry substance management platform BOMCheck to share declarations for Substances of Very High Concern (SVHCs) and link this information to our IT systems. In this way, we can actively manage risks related to substance restrictions. The implementation of the Substances of Concern in Products (SCIP) reporting requirement, a database established under the EU's Waste Framework Directive that registers products containing SVHCs, has been set up in a Sharepoint for data collection.</p>
	Percentage of eligible products, by revenue, certified to an energy efficiency certification	RT-EE-410a.2	Not applicable	
	Revenue from renewable energy-related and energy efficiency-related products	RT-EE-410a.3	↗ <a href="#">Sustainability Report 2024: p. 29, Decarbonization</a> , p. 28-34; ↗ <a href="#">Annual Report 2024: 2.10.2.5 EU Taxonomy</a> , p. 57-81	We are disclosing revenue, capital expenditure and operating expenses in line with EU Taxonomy criteria.
Materials Sourcing	Description of the management of risks associated with the use of critical materials	RT-EE-440a.1	↗ <a href="#">Sustainability Report 2024: Product Stewardship</a> , p. 48-51; <a href="#">Sustainable supply chain management</a> , p. 52-55	
Business Ethics	Description of policies and practices for prevention of: (1) corruption and bribery and (2) anti-competitive behavior	RT-EE-510a.1	↗ <a href="#">Sustainability Report 2024: Compliance and integrity</a> , p. 58-61	
	Total amount of monetary losses as a result of legal proceedings associated with bribery or corruption	RT-EE-510a.2	↗ <a href="#">Annual Report 2024: Note 14, Provisions</a> , p. 115; <a href="#">Note 18, Legal proceedings</a> , p. 118	
	Total amount of monetary losses as a result of legal proceedings associated with anticompetitive behavior regulations	RT-EE-510a.3	↗ <a href="#">Annual Report 2024: Note 14, Provisions</a> , p. 115; <a href="#">Note 18, Legal proceedings</a> , p. 118	
Activity Metric	Number of units produced by product category	RT-EE-000.A	Not applicable	To get an understanding of our company structure, please refer to ↗ <a href="#">Sustainability Report 2024: Siemens Energy at a glance</a> , p. 10-11
	Number of employees	RT-EE-000.B	↗ <a href="#">Sustainability Report 2024: Working at Siemens Energy</a> , p. 62-70
