

Web User Interface (UI)

in cooperation with **SUPPLYON**

Key Points:

- Invoice creation on SupplyOn platform with validation of Siemens Energy & country specific rules
- All required PO fields are pre-filled, only supplier specific invoice data to be filled

Web User Interface requirements:

- Supplier needs to be registered in SupplyOn
- Regular Web browser needed (e.g. Edge, Chrome, etc.)

Integration process steps:

- No technical integration steps required
- Register for free training

What are the benefits?

- Ready-to-bill items can be invoiced directly in the system
- Only six fields with supplier specific information to be maintained
- Reduced leadtime from invoice receipt to payment
- Quality check before invoice booking
