

# Carina Brehm, Vice President, Operations

Carina Brehm was appointed Vice President of Operations effective September 1, 2024. Carina joins from Siemens Energy's Grid Technologies business where she drove the growth strategy as Vice President Strategy. In addition, she was responsible for quality and safety, as well as lead the sustainability efforts.

Carina started her career as an In house Consultant in the automotive industry leading projects in strategy and operations.

After joining Siemens AG in 2014, Carina pursued her career as Factory Manager in Austria, where she designed and manufactured transformers for European and Chinese wind power OEMs.

Afterwards, Carina was responsible for a global transformer business, driving profitable growth and orchestrating a factory footprint in nine countries. In that role, she successfully conducted global technology transfers, developed the supply base, and drove process optimization in the network.

Carina holds degrees in Industrial Engineering and Business from universities in Germany and The Netherlands. Her career spans positions in Germany, Austria, and India.
