

Siemens Energy - SASB Index 2025

Topic	Account Metric	Code	Reference	Explanation
Energy Management	Total energy consumed	RT-EE- 130a.1	Group Sustainability Statement 2025: 2.10.2.1.7 Energy Consumption and mix, pp. 73 - 74	
	Percentage grid electricity Percentage renewable			
Hazardous Waste Management	Amount of hazardous waste generated, percentage recycled	RT-EE-150a.1	Group Sustainability Statement 2025: 2.10.2.2 Resource use and circular economy, pp. 78-83	
	Number and aggregate quantity of reportable spill, quantity recovered	RT-EE- 150a.2	Group Sustainability Statement 2025: 2.10.1.2.3 Impacts, risks and opportunities, pp. 52-55; Annual Report 2025: 2.8.4 Risks and opportunities, p.42	During fiscal year 2025, there were no significant environmental incidents related to spills by Siemens Energy.
Product Safety	Number of recalls issued, total units recalled	RT-EE-250a.1		Product safety encompasses the safety of all products, solutions, and services manufactured, provided, and/or sold by Siemens Energy. These products, solutions, and services are developed according to the latest technical knowledge and comply with applicable legal requirements to ensure that they do not pose an unacceptable risk to life, health, property, or the environment. Product stewardship at Siemens Energy follows the key standards of the ISO 14000 series, with individual approaches for each Business Area. The approaches are centrally supported by the respective Global Environmental, Health and Safety (EHS) departments. In fiscal year 2025, improvement measures included the introduction of a specific in-service risk assessment procedure at the corporate level, enhancement to an existing issue handling process after conducting a crisis management simulation, numerous Product Safety Officer training workshops, supplier quality, and procurement customized product safety training as well as continued product safety awareness training. Projects have been initiated to strengthen our knowledge and improve any weaknesses and collaboration to better serve our customers, both internal and external. During fiscal year 2025, there were zero significant product safety incidents reported.
	Total amount of monetary losses as result of legal proceedings associated with product safety	RT-EE-250a.2	Annual Report 2025: Note 15, Provisions, p. 177; Note 19 Legal proceedings, p.181	

Siemens Energy - SASB Index 2025

Topic	Account Metric	Code	Reference	Explanation
Product Lifecycle Management	Percentage of products by revenue that contain IEC 62474 declarable substances	RT-EE-410a.1		<p>We aim to comply with all legal requirements, such as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals), RoHS (Restriction of Hazardous Substances), TSCA (Toxic Substances Control Act) and similar global chemical restrictions regulations, our SAP systems and similar international requirements. Siemens Energy uses globally standardized materials and substance registers for restricted and declarable substances and products. The updated ECHA list identifies any substances that need to be declared for each product (ECHA = European Chemicals Agency). As part of the Siemens Energy supplier assessment and qualification process, suppliers are required to identify whether any of their products or components contain substances that need to be declared according to the specific legislation. Suppliers then need to provide a detailed declaration should any such substances be used within their design and manufacturing activities.</p> <p>We encourage our suppliers to use the industry substance management platform BOMCheck and OSP (One Supplier Portal) to share declarations for Substances of Very High Concern (SVHCs) and link this information to our IT systems. In this way, we can actively manage risks related to substance restrictions and investigate for possible substitutions. In addition, we are proactively assessing the potential relevance of PFAS in our product portfolio to ensure we anticipate regulatory developments and maintain compliance across our value chain.</p>
	Percentage of eligible products, by revenue, certified to an energy efficiency certification	RT-EE-410a.2	Not applicable	
Materials Sourcing	Revenue from renewable energy• related and energy efficiency-related products	RT-EE-410a.3	Annual Report 2025: 2.10.2.3 EU Taxonomy, pp. 84 - 106	
	Description of the management of risks associated with the critical materials	RT-EE-440a.1	Group Sustainability Statement 2025: Our strategy for the energy transition, p.51; Annual Report 2025: 2.8.4 Risks and opportunities, pp. 38 - 40	
Business Ethics	Description of policies and practices for prevention of corruption and bribery and anti-competitive behavior	RT-EE-510a.1	Annual Report 2025: 2.10.4.1.2 Business conduct policies and corporate culture, pp. 130 - 133	
	Total of monetary losses as a result of legal proceedings associated with bribery or corruption	RT-EE-510a.2	Annual Report 2025: Note 15, Provisions, p. 177, Note 19 Legal proceedings, p.181	
	Total amount of monetary losses as a result of legal proceedings associated with anticompetitive behavior regulations	RT-EE-510a.3	Annual Report 2025: Note 15, Provisions, p. 177, Note 19 Legal proceedings, p.181	
Activity Metric	Number of units produced by product category	RT-EE-000.A	Not applicable	To get an understanding of our company structure, please refer to the Annual Report 2025, 2.4 Results of operation, pp.18 -20; Group Sustainability Statement 2025: 2.10.1.2.1 Business model, value chain and strategy, pp. 48 - 49
