

Thomas Tiemeyer

Head of Sustainable Energy System Sales
Industrial Applications
Siemens Energy

Speaker

Thomas Tiemeyer has 20+ years of experience in the energy and industrial production industries. His work includes consulting and supporting customers in transitioning towards sustainable energy in heat-driven process industries as well as other sectors. Thomas spent many years working internationally and has been leading international and multidisciplinary teams. He holds a certificate as executive Six Sigma Black Belt, quality management auditor, PSDM trainer (Problem Solving & Decision Making (8D)) and a graduate degree in mechanical engineering and production engineering from the Ulm University of Applied Sciences.
