

Prof. Dr. Thomas Thiemann

Senior Vice President
Transition Technology
Siemens Energy

Speaker

After his PhD Thomas Thiemann worked for five years in international iron- and steelmaking R&D projects. He joined Siemens in 2001 and worked in various steam turbine management positions. In April 2020 he became the Senior Vice President for Energy Transition Technologies. In this role, he helps to shape the Siemens Energy decarbonization portfolio according to the future needs. He is also active in a variety of external duties: He is president of the European association of turbine OEM's (EUTurbines), vice chair of the board of VDMA power systems, holds a lecture series at the university of Bochum and is also engaged in international conferences and doctoral committees.
