

# Alert Definition - Overview

## SEE powered by SCoTTy 2.0

<b>Order confirmation</b>	<ul style="list-style-type: none"> <li>1 - Order confirmation due date upcoming</li> <li><b>2 - Order confirmation overdue</b></li> <li>2.1 – Order confirmation maintenance</li> </ul>	<b>Supplier response requested/ possible</b>
<b>Delivery</b>	<ul style="list-style-type: none"> <li>3 - Due Date Upcoming in 7 days</li> <li><b>4 - Due Date Upcoming</b></li> <li>5 - Goods Receipt Overdue</li> <li>6 - Confirmed Date Overdue</li> <li><b>7 - Confirmed Date Overdue SL</b></li> </ul>	Reminder alert, only. <b>Supplier response <u>not</u> requested/ possible</b>

! Alerts follow a standard logic across all Siemens Energy sites

## Alert Definition - Details

### SEE powered by SCoTty 2.0

<p><b>Order Confirmation Due Date Upcoming (- 2 Days)</b></p> <p>Checks today's date is more than 7 (<math>\geq 0</math>)* days later than the document date of the PO</p>
<p><b>Order Confirmation Overdue (- 2 Days)</b></p> <p>Checks today's date is more than 10 days (<math>\geq 2</math>)* later than the document date of the PO</p>
<p><b>Order Confirmation Maintenance</b></p> <p>Allows suppliers to update confirmed dates, earliest 14 days after PO creation</p>

\*new compared to SCoTty 1.0

<p><b>Due Date Upcoming in 7 Days</b></p> <p>Checks if today's date is within 7 days of the delivery date from the schedule line</p>
<p><b>Due Date Upcoming</b></p> <p>Checks if today's date is between 1 and 6 days away from the delivery date from the schedule line</p>
<p><b>Goods Receipt Overdue</b></p> <p>Checks if today's date is after the delivery date from the schedule line of SAP delivery schedule</p>
<p><b>Confirmed Date Overdue</b></p> <p>Checks if today's date is after the confirmed delivery date from supplier's order confirmation considering (= adding) the GR processing time</p>
<p><b>Confirmed Date Overdue SL</b></p> <p>Checks if today's date is after the confirmed delivery date from the order confirmation + GR processing time. If no confirmation is available, it will use the delivery date from the schedule line</p>

**Both alerts**

- ... Require a supplier answer
- ... Are sent repeatedly as long as Order Confirmation is not available
- ... Stop latest until 90 days after delivery date (or PO deletion)
- ... Are mutually exclusive.

**Recommendation:**

Activate both alerts or minimum Order confirmation overdue

Is only sent once (7 days after PO release)

Is sent acc. to local expediting schedule (if it's Mon – Fri = every day)

**Recommendation:** activate minimum Due Date Upcoming

This alert refers to the SE delivery date. In case supplier does not send a PO confirmation or a deviating date this alert might consider an unconfirmed date

This alert refers to the supplier's confirmed delivery date adding the Goods receipt processing time from the material master

This alert combines alert 5 + 6, but sets priority on confirmed date. Only if there is no supplier's confirmation it considers the SE date.  
**Recommendation:** activate minimum Confirmed Date Overdue (as this covers all possibilities to send a delivery overdue alert)
