

Flexible solutions

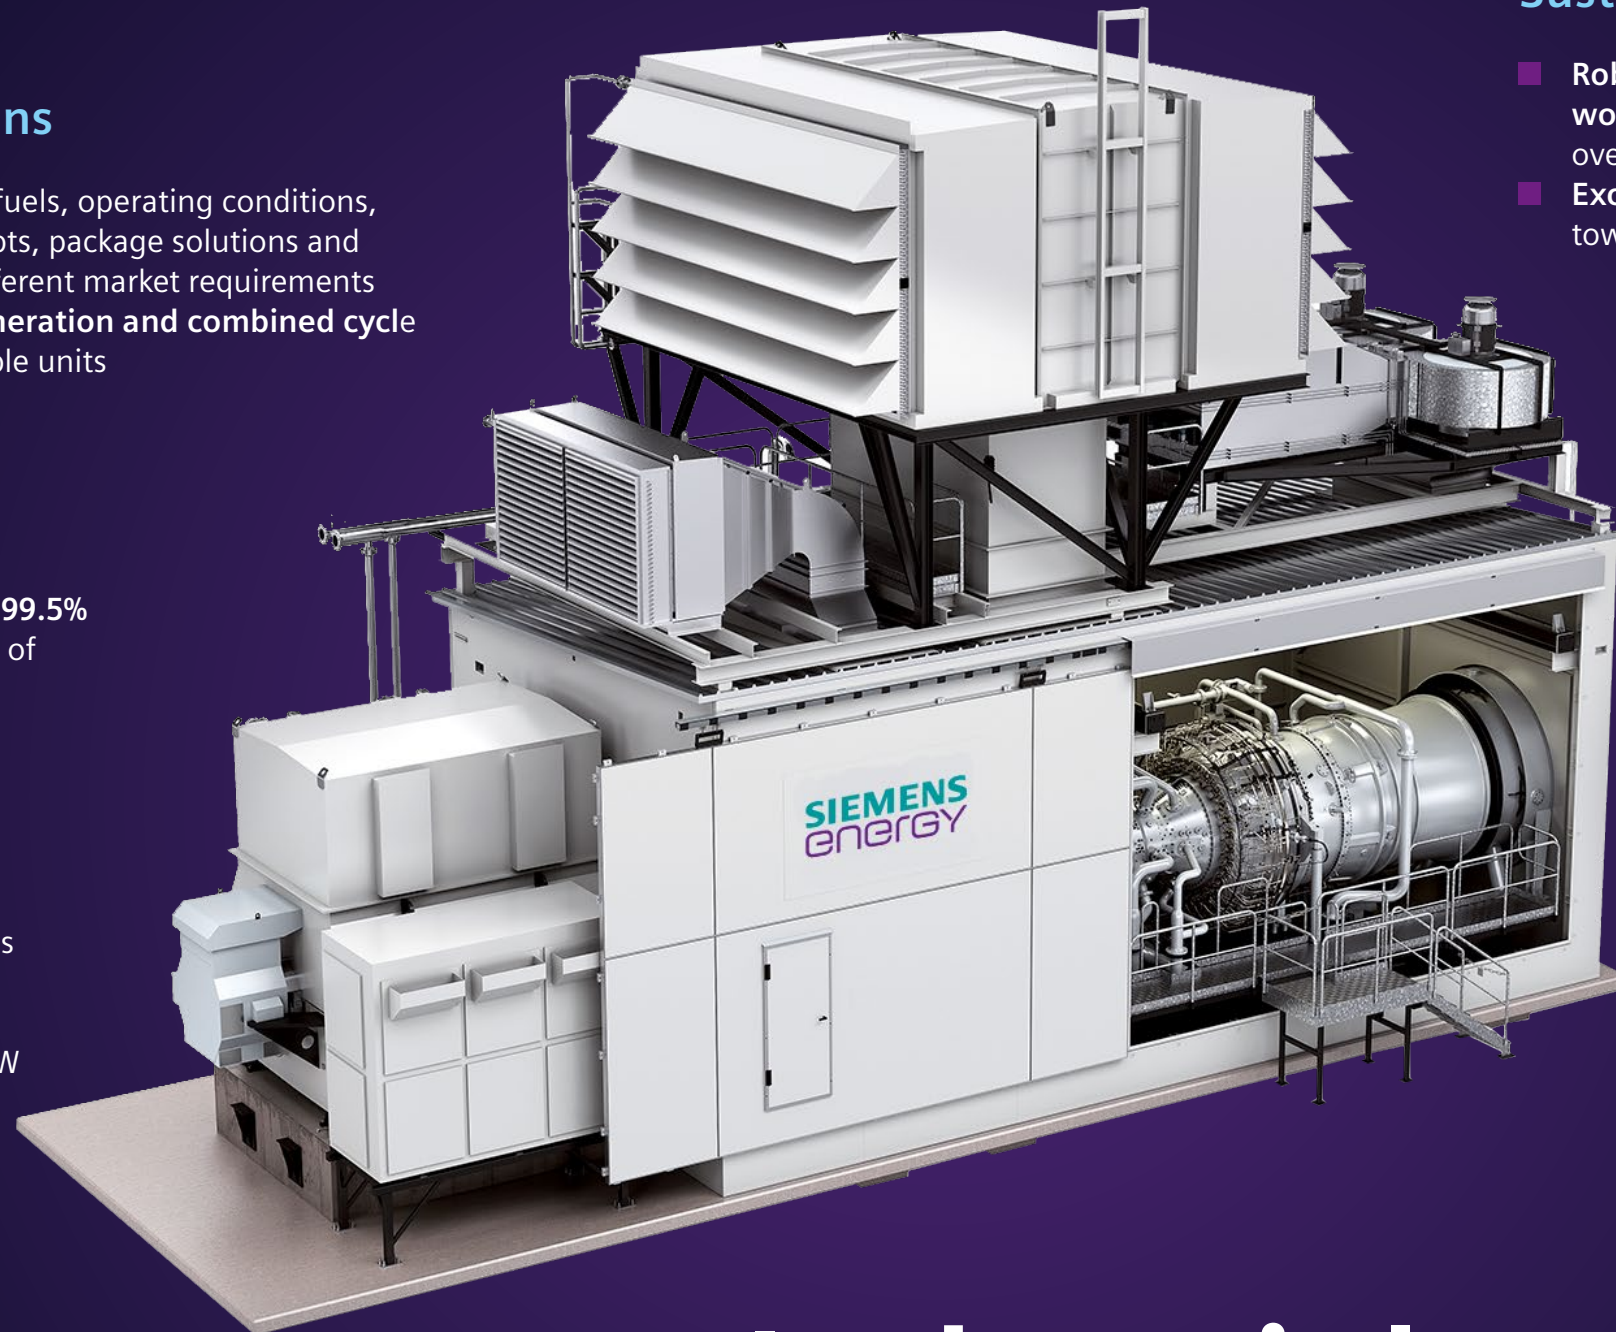

- **Broad flexibility** in fuels, operating conditions, maintenance concepts, package solutions and ratings to satisfy different market requirements
- **Simple cycle, cogeneration and combined cycle** with single or multiple units

Proven reliability

- World-class reported fleet **reliability of >99.5%**
- **Proven long-term record** with hundreds of successful installations around the world

Excellent performance

- **Highest plant efficiency** ensures low life-cycle cost and small environmental footprint
- **>60% market share** in 42–75 MW range for the last 3 years

Sustainable & future proof

- **Robust dual fuel DLE system** with world-class emission performance over a wide load range
- **Excellent fuel flexibility**, moving towards **100% hydrogen target**

Capable to burn
75%*
hydrogen 

* H2 content in natural gas (volume percent)

Industrial gas turbine SGT-800

Combines a reliable robust industrial design with high efficiency, flexibility and low emissions
