

UPS CP200i

Training at LCM Offshore and
Marine - Trondheim

Welcome to Siemens Energy AS

We welcome you to our UPS training in Trondheim. To ensure that our customers take full advantage of their UPS systems and contribute to safe operation of the rig, Siemens Energy has developed courses on how to operate, maintenance and repair our CP200i installations.

Arrival

Register at our reception (building 2) at 09:00 when you arrive for the training.

Siemens Energy AS

Bratsbergveien 5
7073 TRONDHEIM

Travel

Lunch and coffebreakes are included in the course fee.

Course description

Duration: 2 days

Language: Norwegian and English

Target group: All personel involved in operation, service, and maintenance of CP200i systems.

The course provides a thorough introduction to the core components of the UPS system, including operation, maintenance, and repair.

Main topics

System Design:

Design of the CP200i UPS and interconnection with rig systems

Documentation:

Drawings, reference system, functionality, and other essential documents

System components:

Detailed description and knowledge about system components like rectifier, inverter, and static bypass and components they are made of.

HMI:

Functionality and troubleshooting

Procedures:

For safe operation of UPS systemes we practice on correct use of relevant UPS procedures.

Schedule

Day 1

- Introduction
- Technology, construction, and philosophy
- Lunch
- HMI, menu system and principles for operation
- Circuit diagrams

Day 2

- Procedures / operating the UPS
- Lunch
- Operation and troubleshooting
- Q & A, Summary and Evaluation

Instructors

The courses are hosted by experienced service- and commissioning engineers. All engineers are working exclusively with UPS systems and have experience both from theory and from several years in the field working with commissioning, maintenance, troubleshooting and repairing of Siemens Energy UPS systems.

“Since 1978 Siemens Energy OMC has delivered UPS systems specially designed for offshore operation in Norway.”
